### ASIRT Road Travel Reports (RTRs)

ASIRT writers and researchers create and update comprehensive copyrighted reports describing:

- general road conditions
- frequent road crash sites
- national road safety statistics
- driver behaviors
- driving regulations
- urban, rural, night and seasonal travel conditions
- pedestrian, passenger and cycle safety tips
- quality and availability of emergency medical care
- important contact information

### Corporate-Specific Information

ASIRT staff incorporates corporate-specific requests within RTRs:

- statistics on commercial vehicle road crashes
- vehicle restrictions and regulations
- distracted driving laws and risks
- urban travel including roads particularly difficult for trucks to negotiate
- pilot car requirements
- road restrictions
- city- and route-specific information and maps
- routes between areas of interest
- hazard information
- port and rail information
- border crossings
- security risks
- assistance

### Hazard Information

ASIRT RTRs cover potential hazards for various terrains and weather conditions including:

- gravel roads and dust
- heat, snow and ice
- blizzards and white-out conditions
- avalanche areas
- fog
- wind
- mud
- wildlife-prone areas
- fatigue
- weather effects on tire safety
- carjacking
- hitchhikers

### Updates and Commissions

Corporations make specific requests to update existing RTRs or to create new country or regional RTRs
